FOREWARD

The publishers of this magazine do so in a reaffirmation of the belief that realism in art, photography, or literature is never a crime, but a restatement of that which already exists.

Neither do we reserve ourselves the right to pass judgment over the morality or integrity of persons who find satisfaction in a different way of life.

We believe that the truth is never so ugly as ignorance or it's child, prejudice.

Therefore all material contained herein depicts real sexual communication between consenting adults such as that which has been well documented by sex studies and official state records of every country in the world. Nothing depicted is actually novel or new on this planet and we hope by its publication it will foster a new level of tolerance and understanding in our all too bigoted generation.
